

ABB Power Technologies

Substation, Distribution and Switchgear Equipment

A broad line of utility and industrial applications through 138kV and power transformers through 25,000kVA

ACME Electric Corporation

Power Distribution and Control

Dry-Type Transformers, 50VA to 750kVA

Data-Linc Group

Industrial Data Communications

Wire, Fiber and Wireless Modems Ethernet and RS232

Dell Computer

Servers, Desktops, Notebooks

Pre-configured for A-B networks

Emerson Motor Technologies

U.S. Electrical Motors

AC/DC Motors Fractional to 4000HP

Vertical and Horizontal Gear and Mechanical Drives

Hammond Power Solutions

Transformer Products

Control Transformers Distribution Transformers to 3000kVA and 25kV

Prosoft Technology, Inc

Communication Solutions for Rockwell Automation

Rockwell Automation

Allen-Bradley

Industrial Automation Products

Engineered Information and Automation Systems

Distributed Control Systems

Programmable Controllers

AC/DC Drive Systems

Electronic Operator Interface

Industrial Controls

Rockwell Software

Software Technology Products

Information Management
Visualization
Communication
Process Control
Design and Documentation

Spectrum Controls, Inc
Specialty I/O for Allen-Bradley Platforms

Teco Westinghouse
Induction, Synchronous, and DC Motors and Generators
Horizontal and vertical configuration from ¼ HP to 100,000 HP

Trans-Coil, Inc
Power Conditioning Equipment for Drives

Reactors, Filters, Capacitors, Transformers

Transtector
Transient Surge Suppression Devices
Network, Loop and Power Protection

At Mielke Electric Works, we provide comprehensive solutions for our customers based on technical expertise and industry knowledge. We believe our ability to recommend and supply the best hardware and software products is essential to consistently providing solutions that ensure immediate benefit and long-term value.

Your industry. Your partner. Your solution.

Your industry. Your partner.
Your solution.
